Projects

➤ **Enterprise resource planning (ERP) Software.**

Duration : April 2017- Present.
Team Size : 10
Role Played : Full Stack Developer.
Technologies Used : Java, Spring MVC, Oracle SQL.

This system simplifies day to day task of the company by easily enabling to generate Report , Prints, Maintenance of customer and Followup. I have been working on ERP software from past 2 years which has lots of big module such as ACCOUNTS, PRINTING, REPORT, CUSTOMER MAINTAINANCE etc.

➤ **Google Play Store Application**

CGPI to Percentage-MU

I have developed an android application which has 2000+ downloads till now. This app helps Mumbai University Engineering students to calculate their CGPI and equivalent percentage.

➤ **Record Keeping and Calling – Certification Project**

We were team of 6 peoples who developed this java based desktop application which provides a simple way to store records of all the students. This application was developed using javafx, core java and MySQL.

Certificates & Courses

➤ **CTDP – JAVA** ITSource Technologies Limited

➤ Hcon Security Labs **Penetration Tester Level 1**
