

RESUME

Atul A. Kadam

Email ID: akadam210189@gmail.com

DOB: 21st January 1989

Mobile No: 8928048868

Experience Summary:

- Experience in several projects during 2+ years of career in I.T. services
- Encompassing all phases of Analysis, Design and Development database management as per the client or business requirement
- Monitoring live recharge transactions through database tool & SQL queries. Generating daily revenue reports of vendors using shell scripts(batch jobs)
- Database query experience in SQL, PL-SQL, TOAD, SQL Developer, Stored Procedures, Triggers, ETL, DB audit, batch job processing, creating tables, views, index if necessary
- Experience in production support, development and administration of databases Good understanding of Software Development Life Cycle as well as Software Testing Life Cycle
- Bifurcating the client provided data in excel sheet and importing it to database tool, similarly implementing the PL-SQL queries in TOAD tool to validate the required data
- Assisting manager for making Quarterly Business Report in Microsoft Power Point to showcase the process activities and value added services/ideas
- Attending weekly development calls to represent the process challenges & project details to scrum master and perform a roadmap to implement new checkpoints
- Analyzing and Updating Stored Procedures as per business requirement to display calculations and dashboard charts
- Good team coordinating capability and sound knowledge of Supply Chain and Telecom domain
- Ability to adapt quickly to new technologies and can work independently with minimum supervision
- Experience in working on agile methodology of SDLC for frequent requirement changes

Employment History: (2+ Year)

- **Reliance Communications, Koparkhairane (DAKC), Navi Mumbai (Mar 2017 – Nov 2017)** Working as Assistant Manager on projects involving skills such as SQL, PL-SQL, Validating database records using PL-SQL programming language. Creating Test cases and running it after patches in development environment, Performing regression testing and UAT after builds in production environment.
- **CHAINalytics Services Pvt. Ltd., Whitefield, Bangalore (Sept 2015 – Feb 2017)** Working as Junior Quality Analyst on projects involving skills such as SQL, PL-SQL, Selenium, JAVA. Validating database records using PL-SQL programming language. Selenium Automation using Java, TestNG, SQL, Performance testing, Functional testing on various supply chain software and tools. Creating Test cases and Requirements documents.
- **WNS Business Consulting Services Pvt. Ltd., Mahape, Navi Mumbai (Jul 2014 – Jan 2015)** E-commerce pilot process which includes responsibilities such as Order management, Online transaction processing and customer support.

- **Orient Technologies Pvt. Ltd., Mahape, Navi Mumbai (Nov 2013 – May 2014)**
Monitoring and troubleshooting the Wi-Fi network providing proper solutions to the end users making a report of the network monitored and escalating it to the higher level.

Education:

Year	Degree	Name of the University/Institution	Percentage
2015	PG-DAC (Post Graduation Diploma in Advance Computing)	CDAC, Bangalore	NA
2013	B.E.(Electronics and Telecommunication)	University of Mumbai	65.61%
2009	Diploma(Electronics and Telecommunication)	Maharashtra State Board Of Education	78.97%
2006	H.S.C.	Maharashtra Board	58.00%
2004	S.S.C.	Maharashtra Board	79.06%

Technical Skills:

Technology	HTML5, CSS3, PHP
Programming Language	JAVA, PL-SQL, SQL, VBA Basic
Scripting Language	Python, JSP, XML, Shell Scripting
Microsoft Tools	Word, Power Point, Excel, Visio
Databases	SQL Server-2008/2012/2014, Oracle 11g/12c, MySQL, SSIS, SSRS
Operating System	Windows XP/2007/2010, Unix
Application/Tools	PLSQL Developer, SQL Developer, TOAD, Putty

Project I

Title : **FMIC (Freight Market Intelligence Consortium)**
Environment : **SQL Server-2008/2012/2014, SQL, PL-SQL**

Description: The objective of the project is to provide the client with revalidated data that generates reports; which will either be used by regional stakeholders or business. These reports are region wise like Asia, Europe, Latin America, US. Client can use the data for future business decisions. FMIC Portal provides strategic freight market intelligence, benchmarking, and comparative analysis to its members in a private forum. This Portal is used by clients/Lane owners to calculate Overall transportation cost considering all model factors designed and analyzed by business analyst so as to have cost effective transportation solution applying all aspects of supply chain principles.

- **Project Role:** Data support with the following responsibilities
 - Design the database tables as per the business requirements and to update stored procedures in database using SQL queries
 - Importing Exporting the data from excel to database and perform

- ETL operation on the preloaded data
- To Segregate the data as per the business need and exporting to excel format
- Coordinating with business analysts to receive assets, user stories and deliver the project within SLA
- Running Model Uploader and Data migration Tool and validating data uploaded into Development and Production Environment.
- Modifying procedures as per new change/rule in Model Uploader and Data migration Tool and to validate changes in local and development environment.

Project II

Title : CNP (Carrier Negotiation Portal)
Environment : MySQL, SQL, PL-SQL

Description: A Portal which is used by Lane owners to better bid for carriers and their rates in procurement process. Clients can use the data for future business decisions. This portal was responsible to show calculations and dashboard charts based on carriers uploaded by lane owners giving them idea about profit and Loss with different combinations of carriers uploaded through excel sheets before bidding.

- **Project Role:** Data Support with the following responsibilities
 - Create Base requirement for the project and updating the Stored procedures
 - Creating database tables for lanes, carrier, country using DDL, DML commands
 - Modifying stored procedure for any logic change after analyzing requirement with development lead such as any change in dashboard view for selected filter.
 - Updating the database table with all the project details and communicating the same to business. Interacting with team members for analyzing requirements/user stories.
 - Following all the quality checkpoints to deliver the project Meeting client requirement and deadlines

Project III

Title : ODS (Operational Data Store)
Environment : Oracle 11g, SQL, PL-SQL

Description: ODS means Operational data store, wherein varied Operational data will be stored and used for customer promotions. Due to availability of various type of Operational data, business logic or conditions can be applied for giving differential benefits. As this Operational data was available online, it was possible to provide differential customer benefit in real time. Apart from differential customer benefits it was possible to provide differential dealer incentive like incentive to recharging dealer or to acquiring dealer. We were able to maintain up to 99.9% accuracy in differential customer as well as dealer promotions and operational data availability.

System involved in ODS are:

- 1) Oracle database for better transactional control,
- 2) Tibco Business work flow for online operational data availability and
- 3) Tibco Business Engine for business logic and condition based differential Customer as well as dealer promotions.

- . **Project Role:** Data support with the following responsibilities
 - Design the database tables for all the client requirements and URL parameters to update in database using SQL queries
 - Analysis and modification of stored procedures and batch scripts so as to make available all required operational data (online or offline).
 - Interact with the developers in resolving the development issues related to the website
 - Provide data analysis and validation, Identification of performance issues on production and testing systems
 - PL/SQL and SQL Tuning and Optimization of newly develop and existing applications
 - Interact with internal and external teams to understand requirements, explain issues and prioritize work
 - Design, code, test, debug, and document complex database programs to ensure that data processing production systems meet user needs
 - Coordinating with multiple teams in case of dependency in project management and critical tasks
 - Coordinating with clients to receive assets and deliver the project within SLA
 - Brainstorming with the team members and implementing business rules through scheduled scripts and monitoring respective database changes

Personal Information:

Address : D-1, Priti Complex Co-Operative Society, Airoli Sector-20,
Navi Mumbai-400708, Maharashtra
Mobile No. : 8928048868
E-mail : akadam210189@gmail.com
Date of Birth : 21st January 1989
Gender : Male
Nationality : Indian

Declaration: The information furnished above is correct and true to the best of my knowledge.

Yours Faithfully,
Atul Kadam
