Education

St. Joseph's English Teaching High School SSC - 65%

Bai Ava Bai High School HSC - 60%

GTU B. E. Computer Science and Engineering - 6.2 CGPA

Projects

Learning Management System(LMS)

- In learning management system there were courses, assignments, videos lectures which were assigned to users by the admin
-
- The system had the audience rule system where the admin would define the accessibility, course and assignment with respect to it's starting and expiry dates
-
- Ticketing system where the user facing any issues would raise ticket to Admin or Executive, after solving the issue the admin would close the ticket and mail would be sent to user regarding that

Fitness Manager Gym Management

- The software has the enquiry, admission, follow up, add-on, create batch and diet sections
-
- When any person comes to enquire about gym their entry is made in the enquiry, the option of follow up is there in enquiry. Admission of the enquiries are done at time of joining. If you want to provide any additional feature of gym, it can be done through add-on. We can create batch section trainer wise. Also there is health and fitness section through which we can provide diet content

Key Skills

- Asp. Net c#, Javascript, jquery, web services, HTML
-

Interests

- Listening to music, traveling, Gaming
